Anastasia Mourouzidou
Full Stack Engineer
Gothenburg, Sweden · anast.moud@gmail.com · GitHub · LinkedIn

PROFILE

A developer who came to code through years of solving real problems for real people, first as a translator, then in hotels and a notary office, now in software. When she doesn't know how to solve something, she breaks it into smaller pieces and works through it with whatever she has, rather than waiting for the full answer to arrive. Built and still maintains a live booking platform for a car dealership, picking up Python along the way because the project needed it. Currently adding Swedish to the list (SFI).

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, Node.js/Express, React, Python (FastAPI), Java (Spring Boot)
Backend & APIs: RESTful API design, Layered Architecture, JWT Authentication, Role-Based Access Control, API-first development, Swagger/OpenAPI, Zod validation
Databases: MySQL, MongoDB, Firebase
Testing: Unit & Integration Testing with Jest, Test-Driven Development
DevOps & Deployment: Git, GitHub, Docker, Vercel, Render, Railway, GitHub Pages, environment-based configuration
Methods & Patterns: Agile workflows, clean architecture, OOP principles, scalable system design fundamentals
AI-assisted development: LLM-based coding tools in daily workflow, Gemini API integration, prompt design, code review of generated output

PROJECTS

CARlimera Services | FastAPI · MongoDB · React · TypeScript · Tailwind · Firebase Storage · Vercel · Resend

- Built for a car dealership to give the business a stronger showcase and make booking a viewing or asking the vendor a question, simple and comfortable for customers.
- Full appointment system with slot availability, self-cancellation, multi-state admin approval, Google Calendar sync, and an admin panel with CRUD on cars and appointments, including automatic filtering of sold cars.

Commute Risk Dashboard | *React · Trafikverket API · MyMemory API · Leaflet* · Gemini

- A dashboard meant to be usable from inside a car, showing local weather alongside road conditions (slippery, snowy, dry) and nearby construction, so drivers know what to expect before heading out.
- Real-time data pulled from multiple external sources, rendered on a Leaflet map with a data transformation and filtering layer for usability.

Dev Tools | Gemini API · React · TypeScript · Node.js · Express

- Built after relying on AI tools to improve my own commit messages and organise my changes; also lets any developer ask for code clarifications and learn best practices, useful for juniors especially.
- Full-stack tool integrating the Gemini API, with a modular backend built for adding new features.

Developer Portfolio *Node.js · Express · MongoDB · JWT · Zod · Swagger · React · TypeScript*

- Personal site hosting my projects, an introduction to who I am and what I do, and a way for people to get to know me beyond a CV.
- Full-stack build: a production-style REST API with JWT auth, Zod validation and Swagger docs, covered by unit and integration tests, behind a fully responsive React/TypeScript frontend with Framer Motion transitions.

Library App | *Java · Spring Boot · MySQL · JWT · Swagger · JPA Auditing · Gradle · Railway*

- Lets users browse and search a book inventory using the Google Books API, surfacing details like plot and release year.
- Secure full-stack system with JWT authentication, role-based access control and layered REST APIs, documented with Swagger/OpenAPI.

WORK EXPERIENCE

Content Moderator (German Market) | Teleperformance Hellas | *2024 – 2025*

- High-volume, deadline-driven content review requiring accuracy and structured decision-making.

Assistant | AlphaCode Software Solutions | *2023*

- Built Flutter UI prototypes, including a Firebase-authenticated login flow for a car dealership; maintained live WordPress content.

Secretary | Notary Office "Arapakis Nikolaos" | *2021 – 2022*

- Managed legal documentation and deadlines across active cases, coordinating directly with clients, courts and tax authorities.

Guest Relations Officer | Marbella Corfu · Parga Beach Resort **|** 2021

- Handled guest relations across two properties; migrated paper records into Fidelio Suite8 with no prior training.

EDUCATION

Coding Factory – Athens University of Economics and Business | *Full-Stack Software Development Program* | 2025 - 2026

- Developed full-stack applications using Node.js, React, Java, Spring Boot, Angular, SQL/NoSQL.
- Built RESTful APIs with JWT authentication and database integration.
- Applied software engineering principles: OOP, layered architecture, version control with Git; worked in Agile teams.

Ionian University – Bachelor of Arts in Translation, *Department of Foreign Languages, Translation and Interpreting* - Corfu, Greece | 2016 - 2022

LANGUAGES

Greek (Native) · English (Fluent) · German (Intermediate) · Swedish (Beginner)

VOLUNTEERING

Pink Programming (Code Mentor), Gothenburg Tech Week, Gothenburg Tech Week x Chalmers Hackathon (participated)
