

Anastasia Mourouzidou

Full Stack Developer

Gothenburg, Sweden · anast.moud@gmail.com · [GitHub](#) · [LinkedIn](#)

PROFILE

Full-stack Software Engineer with hands-on experience in Java, Spring Boot, RESTful API development, and React/TypeScript, building scalable web applications with a focus on clean architecture, authentication, and maintainable backend systems. Experienced in designing and implementing backend services, integrating databases (SQL and NoSQL), and developing full-stack applications with production-style deployment and testing. Comfortable working in Agile, cross-functional teams and motivated to contribute to scalable systems, system design, and modern software development practices.

TECHNICAL SKILLS

Languages & Frameworks: Java, Spring Boot, Node.js, Express.js, TypeScript, JavaScript, React

API & Backend Development: RESTful API Design, Layered Architecture, JWT Authentication, Role-Based Access Control, API-first Development, Zod Validation, Swagger / OpenAPI

Databases: MySQL, MongoDB

Testing: Unit & Integration Testing with Jest, Test-Driven Development

DevOps & Deployment: Git, GitHub, Postman, Cloud Deployment, Environment-based Configuration (dev/prod), Production Deployment (Railway, Render, Firebase, GitHub Pages)

Methods & Patterns: Agile workflows, clean architecture, OOP principles, scalable system design fundamentals

PROJECTS

[Library App](#) | *Java · Spring Boot · MySQL · JWT · Swagger · JPA Auditing · Gradle · Railway*

- Built a full-stack application with secure authentication and role-based access control
- Designed RESTful APIs using layered architecture with focus on maintainability and scalability
- Integrated frontend and backend with clean API contracts and deployed application to production environment

[Developer Portfolio Backend API](#) | *Node.js · Express · MongoDB · JWT · Zod · Swagger*

- Designed and built a production-style REST API with authentication and validation
- Implemented unit and integration testing across all endpoints
- Documented full system using Swagger/OpenAPI and structured backend architecture

[Developer Portfolio](#) | *React, TypeScript*

- Built a fully responsive personal portfolio using React and TypeScript with reusable component architecture
- Implemented smooth page transitions and UI animations using Framer Motion

[Dev Tools](#) | *Gemini API · React · TypeScript · Node.js · Express*

- Built a full-stack developer productivity tool integrating external AI APIs
- Designed scalable backend structure for future feature expansion
- Focused on improving developer workflow efficiency and automation

[Commute Risk Dashboard](#) | *React · Trafikverket API · MyMemory API · Leaflet*

- Built a real-time dashboard combining multiple external data sources
- Designed interactive UI for interpreting real-world conditions
- Implemented filtering and data transformation logic for usability

WORK EXPERIENCE

Content Moderator (German Market) | Teleperformance Hellas | 2024 – 2025

- Worked in a high-volume environment requiring structured decision-making and attention to detail
- Collaborated in a distributed team, ensuring consistent quality under strict deadlines
- Developed strong responsibility for accuracy and reliability under pressure

Assistant | AlphaCode Software Solutions | 2023

- Built Flutter-based mobile UI prototypes including a multi-page BMI calculator app and a Firebase-authenticated login/registration flow for a car dealership, applying newly acquired skills to real product interfaces.
- Managed and updated product listings and content using WordPress, maintaining accuracy across a live business environment.
- Completed certifications in HTML & CSS (Codecademy) and Figma Essentials (Udemy) during the role, establishing a foundation in frontend tooling and UI design.

Secretary | Notary Office "Arapakis Nikolaos" | 2021 – 2022

- Managed legal documentation workflows across multiple active cases, using Excel to track deadlines and filing obligations with government bodies including tax authorities and courts.
- Coordinated daily communication with clients and public institutions to advance inheritance, property transfer and land registration cases, maintaining accuracy and confidentiality throughout.
- Handled administrative operations independently, including document preparation, compliance checks and use of the B-symbolaio legal management system.

Guest Relations Officer | Marbella Corfu · Parga Beach Resort | 2021

- Handled guest relations across both hotel environments — managing complaints, coordinating room assignments and ensuring smooth stays from check-in to departure.
- Onboarded onto Fidelio Suite8 hotel management software with no prior training, independently migrating paper-based reservation records into the live system while maintaining daily operations.

EDUCATION

Education

Coding Factory – Athens University of Economics and Business | Full-Stack Software Development Program | 2025

- Developed full-stack applications using Node.js, React, Java, Spring Boot, Angular, SQL/NoSQL.
- Built RESTful APIs with JWT authentication and database integration.
- Applied software engineering principles: OOP, layered architecture, version control with Git; worked in Agile teams.

Ionian University – Bachelor of Arts in Translation, Department of Foreign Languages, Translation and Interpreting - Corfu, Greece | 2016 - 2022
